

## Flanged Jamesbury™ ball valves ASME class 150 & 300 full bore: 1/2" - 24" (DN 15 - 600) series 9000

The Jamesbury polymer-seated flanged ball valves provide industry leading performance and reliability. Offered in a wide variety of materials to suit an extensive range of applications these valves are designed and manufactured with all our latest technology and expertise.

### Unique sealing

The superior performance of Jamesbury ball valves is achieved by the unique design of the seats. The flexible lip seats exert continuous sealing pressure on the ball and automatically compensate for wear and changes in pressure and temperature, yielding positive bi-directional zero-leak shut-off. The stem seal sealing system ensures minimum emissions.

### Materials

Standard products are available with carbon steel body and stainless steel trim or all stainless steel construction. Special body and trim materials such as Alloy 20, Hastelloy® C, and others are available upon request. For applications involving chemicals, acids, caustics, and steam we recommend our Xtreme™ seat material, which provides superior life-cycle and sealing performance compared to virgin or filled PTFE. We can accommodate nearly any special customer or application specific requirement.

### Fire-Tite™ valves

All Jamesbury Fire-Tite flanged ball valves are qualified to API 607 and ISO 10497. This ensures minimal leakage in the event of a fire.

### CE marked

CE marked and documented product conforming to the European Pressure Equipment Directive (PED) 2014/68/EU and ATEX Directive 2014/34/EU Equipment category II 2 G/D is available as standard product.

### Features and benefits

- Robust engineering design yields leading cycle life
- Outstanding quality provides confidence
- Flexible lip seat provides bi-directional zero-leak shut-off and minimum maintenance
- Xtreme seats provide longer life and expanded pressure-temperature capability
- Patented stem seal system engineered to provide superior emissions performance (1/2" - 11/2")
- Live loaded stem packing enhances emissions performance and reduces maintenance (1/2" - 12")
- ISO 5211 bonnet mounting design (1/2" - 6")
- Compliant with API-598 (1/2"-12")
- API 607 qualified
- API 608 compliance & grounding as standard (2" - 12")
- ISO 15848-1 Class BH rated (1/2" - 6")
- Standard materials meet requirements of NACE MR0103 and MR0175 (See How to order page)
- SIL 3 qualified

### Emission-Pak™ valves

Jamesbury Emission-Pak products feature a double steam seal packing system to provide additional sealing performance for critical services. This feature is ISO 15848-1 Class AH rated.

### Automated assemblies

Valves, actuators, and accessories designed to mate together with precision ensures superior performance.

## Specifications

### Flow data

The table at right provides flow coefficients for Jamesbury valves covered in this bulletin.  $C_v$  values represent the flow of water at +60°F through the valve in U.S. gallons per minute at a pressure drop of 1 psi. The metric equivalent,  $K_v$ , is the flow of water at +16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm<sup>2</sup>. To convert  $C_v$  to  $K_v$ , multiply by 0.8569.

### Valve body ratings

These are the maximum working pressure ratings of the valve body only. The seat ratings, shown on the next page, determine the practical temperature and pressure limitations according to actual service conditions.

### Valve seat ratings

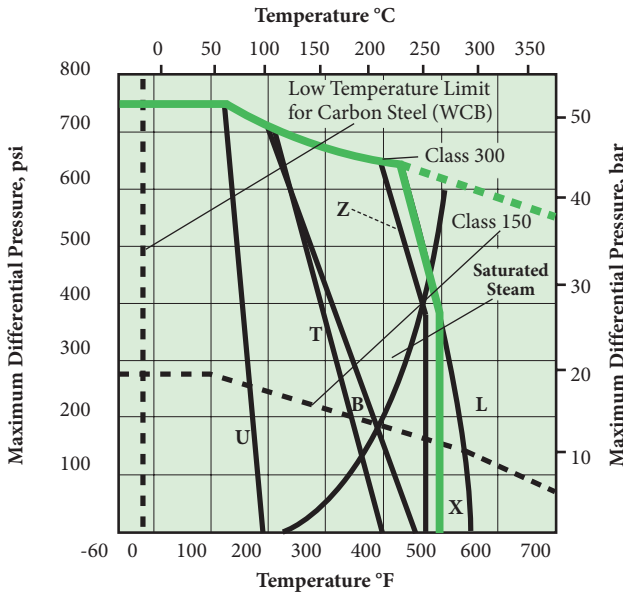

Seat ratings, indicated by solid lines in the charts on the next page, are based on differential pressure with the valve ball in the fully closed position and refer to seats only. The dotted lines indicate maximum working pressures for WCB carbon steel valve bodies. (Maximum working pressures of other body materials are shown in the tables above.) The combination of dotted and solid lines indicates the maximum valve rating at specific pressure and temperature conditions. Valves with PTFE, Xtreme, PEEK<sup>®</sup>, PFA, and UHMW polyethylene seats can be used in service to -100°F (-73°C) provided that the valve body material is suitable for such a temperature. Carbon steel valves are rated to -20°F (-29°C).

For more application information on seat materials, refer to Bulletin T140-1.

### Xtreme performance and value

Xtreme seats provide longer life, expanded performance boundaries, and the greatest possible value. Xtreme material is unique, resulting from a technological breakthrough in our polymer research lab. The material is a proprietary fluoropolymer based blend that provides superior quarter-turn performance.

### The Ultimate Process Automation Package for VPVL Pneumatic Actuators, V-Series, ADC-Series and QX-Series Electric Actuators With 1/2" - 6" (DN 15 - 150) Full Port Series 9000

## Automation performance and value

Valves combined with Jamesbury actuators offer a total value and performance package. Available with pneumatic Valv-Powr™ VPVL actuators, V-Series, ADC-Series and QX-Series electric actuators and with Stonel™ Quartz™ and Hawkeye™ digital monitors or VCTs, the packages have a wide range of applications. Visit our website at [www.valmet.com/flowcontrol](http://www.valmet.com/flowcontrol).

**Note 1:** Compression plate, body seal, and gland follower are Monel for valves with Monel or Hastelloy C trim.

**Note 2:** Not used in 14" & 16" (DN 350 & 400) Series 9300 valves.

## Standard valve torque data

Use these torque charts as a guide for actuator selection. Additional requirements may be imposed by media characteristics, trim, and frequency of valve operation. For clean lubricating fluid service, required torque for PTFE (T), Xtreme (X) and filled PTFE (M) seated valves only may be reduced 20% when the valve is equipped with corrosion resistant trim. For difficult services such as slurries and semi-solids, and for oxygen, increase values by 50%. If in doubt, err on the side of safety by using a larger actuator than would normally be selected.

Torque output values and actuator selection tables for the different types of Jamesbury actuators are contained in the bulletins listed below.

Manual Gear Actuators	A100-1
B-Series Piston Actuators	6 B 20
Quadra-Powr X Spring Diaphragm

## ASME Class 150 and 300 standard valve torque data

PTFE (T) Seated Valves

Xtreme (X) and TFM (Z) Seated Valves  
1/2" - 12" (DN 15 - 300)

**Note:** See notes on page 16.

## Standard valve torque data ASME Class 150 and 300 Valves

PEEK (L) Seated Valves 1/2" – 6" (DN 15 – 150)

UHMW Polyethylene (U) Seated Valves

PFA (B) Seated Valves 1/2" – 8" (DN 15 – 200)

- Note 1:** Actuator is required;
- Note 2:** Actuator is required for difficult service;
- Note 3:** Actuator is required for difficult service and pressure greater than 500 psi.
- Note 4:** Dashed line indicates Non-Trunnion and is rated to Class 150 only for seats.

## Emission-Pak series 9000 ball valves

The Emission-Pak provides additional protection from emissions and stem seal leakage, and the ability to monitor leakage for critical applications.

The Emission-Pak is an extended stem retainer containing two sets of stem seals which is mounted in the valve body. A special TFM and graphite gasket maintains a leak-free joint and assures that a Fire-Tite valve retains its fire tested rating.

## Available configurations

Full Bore valves		
Valve	Size range	ASME Class
9150, 9180	1/2" - 6" (DN 15 - 150)	150
9300, 9380	1/2" - 4" (DN 15 - 100)	300

## Features

- Two separate live loaded v-ring stem seals
- One piece stem
- Two thrust bearings
- Optional stem seal monitoring port permits detection of primary stem seal wear or leakage
- ISO 15848-1 Class AH rated

## Qualification test

Emission-Pak 1/2" - 1-1/2" (DN 15 - 40) 9000 series are qualified to ISO 15848-1 AH-CC3-SSA1-T200.

## Emission-Pak valve torque data

Use these torque charts as a guide for actuator selection. Additional requirements may be imposed by media characteristics, trim, and frequency of valve operation. For clean lubricating fluid service, required torque for PTFE (T) and Xtreme (X) seated valves only may be reduced 20% when the valve is equipped with corrosion resistant trim. For difficult services such as slurries and semi-solids, and for oxygen, increase values by 50%. If in doubt, err on the side of safety by using a larger actuator than would normally be selected. Torque output values and actuator selection tables for the different types of Jamesbury actuators are contained in the bulletins listed below.

Manual Gear Actuators	A100-1
B-Series Piston Actuators	6 B 20
Quadra-Powr X Spring Diaphragm Rotary Actuators	A110-4
Valv-Powr Series VPVL	A111-5
VV-Series Electric Actuators	V200-1
ADC-Series Electric Actuators	V201-1
LC Series' Electric Actuators	V202-1 & V203-1
ESR-Series Electric Actuators	V204-1
Q6-Series Electric Actuators	V205-1
QX-Series Electric Actuators	V207-1

## ASME Class 150 and 300 valve torque data

PTFE (T) Seated Valves

Xtreme (X) and TFM (Z) Seated Valves

FB = Full Bore

**Note 4:** Dashed line indicates Non-Trunnion and is rated to Class 150 only for seats.

## Accessories

### Locking Devices

When safety measures are necessary, a reliable locking feature is standard to allow the valve to be padlocked in either the open or closed position.

1/2" - 1-1/2" (DN 15 - 40)  
Series 9000

### Bonnet/Stem extensions

4" (102 mm) bonnet/stem extensions are available for applications and are particularly useful for automated and manual products. Extensions can also be used to prevent interference between actuators and companion pipelines and equipment. They are ideal as extension that require locking lever or locking oval handle capability. Stainless steel construction is also available.

### Stem extensions

4" (102 mm) non-lockable stem extensions are available for manual valves. Extensions can also be used to prevent interference between companion pipelines and equipment. Compatible with all handle options. Stainless steel construction is also available.

1/2" - 1-1/2"

### Round handles

Series 9000 ball valves have optional round handles (non lockable) available. To order handles separately, specify the part number shown in the accessories table below.

### Oval handles with slide-lock

Optional oval handle saves space and may be padlocked to retain the valve in the open or closed position. To order handles separately, specify the part number shown in the accessories table below.

### Cavity fillers

Cavity fillers are available in non-rununion 9000 series full bore valves. The fillers are PTFE or Xtreme and used for sanitary applications and in processes where cross contamination is a concern. Food processing, pharma-chemicals, cosmetics, paints, solvents, finishes and dyes are typical applications where fillers are employed.

**WARNING:**

As the use of the valve is application specific, a number of factors should be taken into account when selecting a valve for a given application. Therefore, some of the situations in which the valves are used are outside the scope of this manual. If you have any questions concerning the use, application or compatibility of the valve with the intended service, contact Valmet for more information.

## How to order

**EXAMPLE:** A 2" ASME Class 150 short design valve (9150) in Fire-Tite design (3) with raised-face flanges (31), carbon steel body (22), and 316 stainless steel trim (36), with Xtreme seats (XTZ) and molecularly enhanced PTFE stem seals is written: 2" 9150-31-2236XTZ1.
